## RESEARCH CRUISE REPORT

## SHIP NAME:

*Ida Green*

## OPERATING INSTITUTION:

University of Texas  
Marine Science Institute

CLEARANCE COUNTRY: Mexico

DATES: June and July 1977

## PROJECT TITLE:

Geophysical Survey of the Middle  
America Trench

## PORT CALLS:

Acapulco, Mexico

## FOREIGN PARTICIPANTS:

Alberto Horacio Comínguez and  
J. Hector Sandoval:  
Centro de Ciencias del Mar y Limnología  
Ciudad Universitaria  
México 20, D.F., México  
José Bustamante  
c/o Instituto Geografic Nacional  
San Salvador, El Salvador, C.A.

## CHIEF SCIENTISTS:

Thomas H. Shipley  
Mark H. Houston  
J. Lamar Worzel

## DESCRIPTION OF SCIENTIFIC PROGRAM:

The purpose of this cruise was to comprehensively study an area of the Mexican continental margin off the State of Oaxaca and compare this margin with an area off Guatemala. The narrow shelf and trench inner wall off Oaxaca has been cited as evidence of tectonic erosion while the area of Guatemala with a wide shelf and inner trench wall has been considered an accreting margin.

The continent and ocean appear to be converging at about 7 cm/yr in the Oaxaca area. We undertook detailed multifold seismic reflection surveys to determine the tectonic fabric and continental margin structure in this zone of convergence. The geophysics survey combined with some sediment samples are being used in proposing sites for scientific drillings in the JOIDES International Phase of Ocean Drilling to test the hypothesis related to the convergence processes.

## OBSERVATIONS AND SAMPLES:

Figures 1-5 show ship track offshore of Mexico. In addition to CDP data, magnetic and bathymetric data was collected along all track in Figures 1-5 except for the area indicated as "no data" in Figure 2.

In the Oaxaca grid area (Figs. 1 and 2) 13 piston core samples were taken. Their position, water depth, and length of core are given below. The samples are stored in Galveston at the UT/MSI Geophysics Laboratory, above address.

## NAME AND ADDRESS OF CONTACT TO WHOM INQUIRIES REGARDING CRUISE SHOULD BE MADE:

Thomas H. Shipley  
(Letterhead address)
